

KB1003 – Licence Activation Procedure

This document outlines the process required to activate a licence to a FULL working version of the product. This assumes that the product has already been downloaded and installed on a client device. Licences are activated per device.

1. Determine the activation code required for the device. Select the **Settings and Configuration button** from the **Geo-Search tab**.

2. From the Licence tab, copy the activation code.

| Customise your Accept the defaults, mak information provided on p | version of the configuration purchase. | the GeoLoca | icenced | S e | | cater ate.Display |

5. From within your members portal, select the menu option (right hand side) for **My Products** & Licences.

6. Then enter (paste) the activation code for the device into the required input box, then add any additional information regarding the activation as you require (i.e. who's computer it may be, who it is assigned to, etc).

Then, depending on how may licences have been purchased and already assigned, select any remaining free **Activate button**.
