

Fast Methods to Access & View Data ... QUICKLY

MAAD2GO designed to make it easy for users of varying skill levels to access and open their files and data.

Instead of the tedious traditional methods of searching for or locating data, this faster method provided by MAAD2GO results in more time available for analysis.

Left Mouse Double Click of the 'Description' column is used for the majority of files opening in their native program – including MapInfo.

Opening Data in their Native Program.

Left Mouse Drag & Drop Used where native programs do not support double click for accessing files – i.e. EASRI ArcGIS.

Left Mouse Single Click

Left Mouse Single Click displays the file's Metadata window in MAAD2GO. [Select the button of the popup thumbnail window to show]
